DETAILED ACTION

Response to Amendment

1. Claims 1-28 and 37-44 have been cancelled.
2. Claims 29-36 are pending.

Specification

3. The Examiner has accepted changes made to the specification.

Response to Arguments

4. Applicant's arguments filed 10 August 2005 have been fully considered and they are persuasive.

Allowable Subject Matter

5. **Claims 29-36** are allowed.
6. The following is an examiner's statement of reasons for allowance: The present invention is directed toward a system for improving the performance of decryption among distributed and serverless file systems by using an encrypted key cache. The independent claim identifies the uniquely distinct features **"of using a comparator to check whether one of the plurality of mappings corresponds to a received access control entry that includes an encrypted symmetric key. Based on the comparison if mappings match the received access control entry then decrypt the file using the symmetric key stored in the key cache and if the mappings do not match the received access control entry then first decrypt the encrypted symmetric key with the private key and then decrypt file with the decrypted symmetric key"**. The closest prior art Etzel et al. (US Patent No. 6,577,734) discloses

a data encryption key management system by preventing external access thereto and ensuring that the keys do not leave an encryption unit in their original form, either singularly or in combination, fail to anticipate or render the above underlined limitations above.

7. Therefore **claim 29** and the respective **dependent claims 30-36** are in condition for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
